#### **ACHIEVEMENTS**

#### Hwa Chong All-Round **Excellence Award**

Recognises 10-15 top students of the graduating cohort

#### Subject Prize Award [Computing] 2019

Top in cohort

Championship and Best Defender, Cyber **Defenders Discovery** Camp (2019)

National capture the flag competition

Joint First in Nationals. International Mathematical Modelling Challenge (IMMC 2018)

Bronze Award, Singapore Science and Engineering Fair (2018 & 2019)

National competition for research

## **VOLUNTEER EXPERIENCE**

Web Developer **Advisory Singapore** 

## **Teaching Assistant** Code in the Community

Taught Python and Scratch

### **Course Creator** Cloudsine Pte Ltd

Initiated a 4-day youth cyber security bootcamp

## **LANGUAGES**

English, Chinese Native or Bilingual Proficiency

Professional Working Proficiency

# Ying Yee Wong (Rae)

Computer Science student at Carnegie Mellon

Passionate about the various fields of Computer Science, including machine learning, cyber security and web application, I believe in creating smart solutions to solve real world problems.

#### **EDUCATION**

## **B.S. in Computer Science** Carnegie Mellon University

08/2020 - Present Pittsburgh, PA, USA

## Singapore-Cambridge GCE A-Levels [7 Distinctions] Hwa Chong Institution

01/2018 - 12/2019

Courses and Activities

- Gifted and Talented Education Program (Physics)
- Co-Chairperson of the 11th International Science Youth Forum (hosted nobel laureates and field medalists)
- Computing (top in cohort), Mathematics, Physics, Economics, H3 Mathematics
- President of Research Council (~200 members)

#### WORK EXPERIENCE

## Web Development Intern Insignia Ventures Partners

08/2020 - Present Singapore

An early stage technology venture fund dedicated to growing influential companies in Southeast Asia Achievements/Tasks

- Developed a venture capital simulator to calculate shares ownership based on funding raised using html, css, js
- Optimised database usage to enhance workflow between departments and management

# Mobile Security Intern

Centre for Strategic Infocomm Technologies (CSIT)

A national security agency that conducts applied research

Achievements/Tasks

03/2020 - 05/2020

- Reverse engineered banking apps using tools such as Frida and Ghidra
- Researched on low level computation and crafted thumb assembly code to perform injected native functions

## Internet of Things Intern

## Government Technology Agency (Advanced Cyber Attack Simulation)

01/2020 - 03/2020 A statutory board under the Prime Minister's Office that uses technology for social good

Achievements/Tasks

Singapore

Singapore

Singapore

- Researched on Bluetooth Low Energy for the development and pen testing of TraceTogether, a contact tracing app rolled out in the nation, downloaded by over 1 million users
- Performed pen testing on various Bluetooth personal devices and drafted a checklist for future standardization
- Simulated a Cross-Site Scripting attack on a self-built IoT system to test web vulnerabilities

#### Research Attachment

#### A\*STAR - Agency for Science, Technology and Research

01/2016 - 01/2019 Achievements/Tasks Sinaapore

- Applied semi-supervised machine learning using libraries such as scikit-learn to develop an Intrusion Detection System for Singapore's critical transport infrastructure
- Developed a GUI for configuration of Linux iptables firewall, taking into account proprietary needs of the Modbus protocol using PyQt
